Semicolons 2017

Problem Statement:

To make a next Generation e-commerce website

Description:

To make a e2e micro website for pizza ordering using chat bots and voice recognition

Project Overview:

The website is majorly divided into 4 parts

1. Customer Front
   Customer ordering Website – UI/UX/HTML5/JS/CSS3

2. BOT Engine
   BOT configuration, Creating ML Dialogues

3. Store Front
   Store Operation Module – MongoDB, REST API, Admin Module

4. Delivery Front
   Order Acknowledgment and Printing on Thermal Printer – BT, SDK integration, REST

Design Overview:
